

## Risk Perspective

### Overview

Risk Perspective from ISF Learning, examines the forces of change facing the organisation and how this triggers new information security risks. Using FACTOR Cascade Analysis (TM), the programme provides an incisive way of looking at the risk landscape through the lens of the business.

The goal is to equip practitioners and leaders with a 'top down' as well as ground up view of information security risk and to increase the practitioner's ability to keep a finger on the pulse of the changing risk landscape.

### Learning Modules

Risk Perspective features three modules, each accompanied by e-learning lessons and three x 1/2-day, live instructor-led sessions:

- 1. The External Environment** - Understanding the external environment and the forces driving new opportunities and threats
- 2. The Cascade of Risk** - Examining the knock-on effect of external forces and how this creates risk
- 3. The Criticality of Information** - Understanding information assets and the challenges associated with protecting and managing them.

### Learning Outcomes

**By the end of this certification participants will be able to:**

- Adapt rapidly to the changing global landscape and keep a finger on the pulse of emerging risks
- Examine how the external environment is impacting the business
- Examine risk from both a business and risk function perspective
- Understand what is driving the information security risk agenda
- Become more wide-angled in your view and understanding of the risk landscape

### ISF Certification Details

**Upon completion of this certification, you will receive:**

- 15 CPE points
- A Bronze, Silver or Gold Risk Practitioner Certification

## Managing Risk

### Overview & Goal:

Managing Risk From ISF Learning, explores the strategic priorities of the organisation and how this influences the changing role of risk function. Examining how risk management must align to the current strategic focus and direction, collaborate with functions and stakeholders and help the organisation to achieve its goals.

The goal is to help practitioners understand the wider changing business framework within which they must operate, in order to drive more value to the organisation. Helping information security become trusted advisors.

### Learning Modules

Managing Risk features three modules, each accompanied by e-learning lessons and three x 1/2-day, live instructor-led sessions:

- 1. The Business Mission** - Understanding how the organisation's business goals and strategic focus, define the role of risk
- 2. The Role of Risk Management** - Risk management's role in helping the organisation maximise opportunities and protect against threats
- 3. The Role of the Risk Practitioner** - Understanding the changing role, responsibilities and priorities of the risk practitioner

### Learning Outcomes

#### By the end of this certification participants will be able to:

- Understand the critical importance of information security risk to the business
- Understand risk management and the role of information security
- Adapt and evolve with the changing needs of the organisation
- Align and work more effectively with other functions
- Integrate their working approach with the business's goals

### ISF Certification Details

**Upon completion of this certification, you will receive:**

## Risk Practice

### Overview & Goal:

Risk Practice from ISF Learning, explores how information assets are exposed to risk and the principles, practices and pitfalls associated with protecting them. It is focused on the most critical information assets across the organisation and between the organisation and its suppliers and partners.

The goal is to equip practitioners with a framework for examining, identifying, and solving the challenges associated with managing and protecting information assets at all stages of their lifecycle.

### Learning Modules

Risk Practice features three modules, each accompanied by e-learning lessons and three x 1/2-day, live instructor-led sessions:

- 1. Information Security** - Understanding the nature of information and the challenges associated with protecting and managing it
- 2. The Standard of Good Practice for Information Security** - Setting a new bar for standards and policies and increasing adoption
- 3. Risk Principles & Practices** - Understanding the principles, practices, and pitfalls when assessing risk

### Learning Outcomes

**By the end of this certification participants will be able to:**

- Advocate and educate the role of information security actively
- Understand best practice in information security and risk
- Manage information assets throughout all stages of their lifecycle
- Identify mission critical assets and crown jewels
- Prioritise risks with confidence and authority

### ISF Certification Details

**Upon completion of this certification, you will receive:**

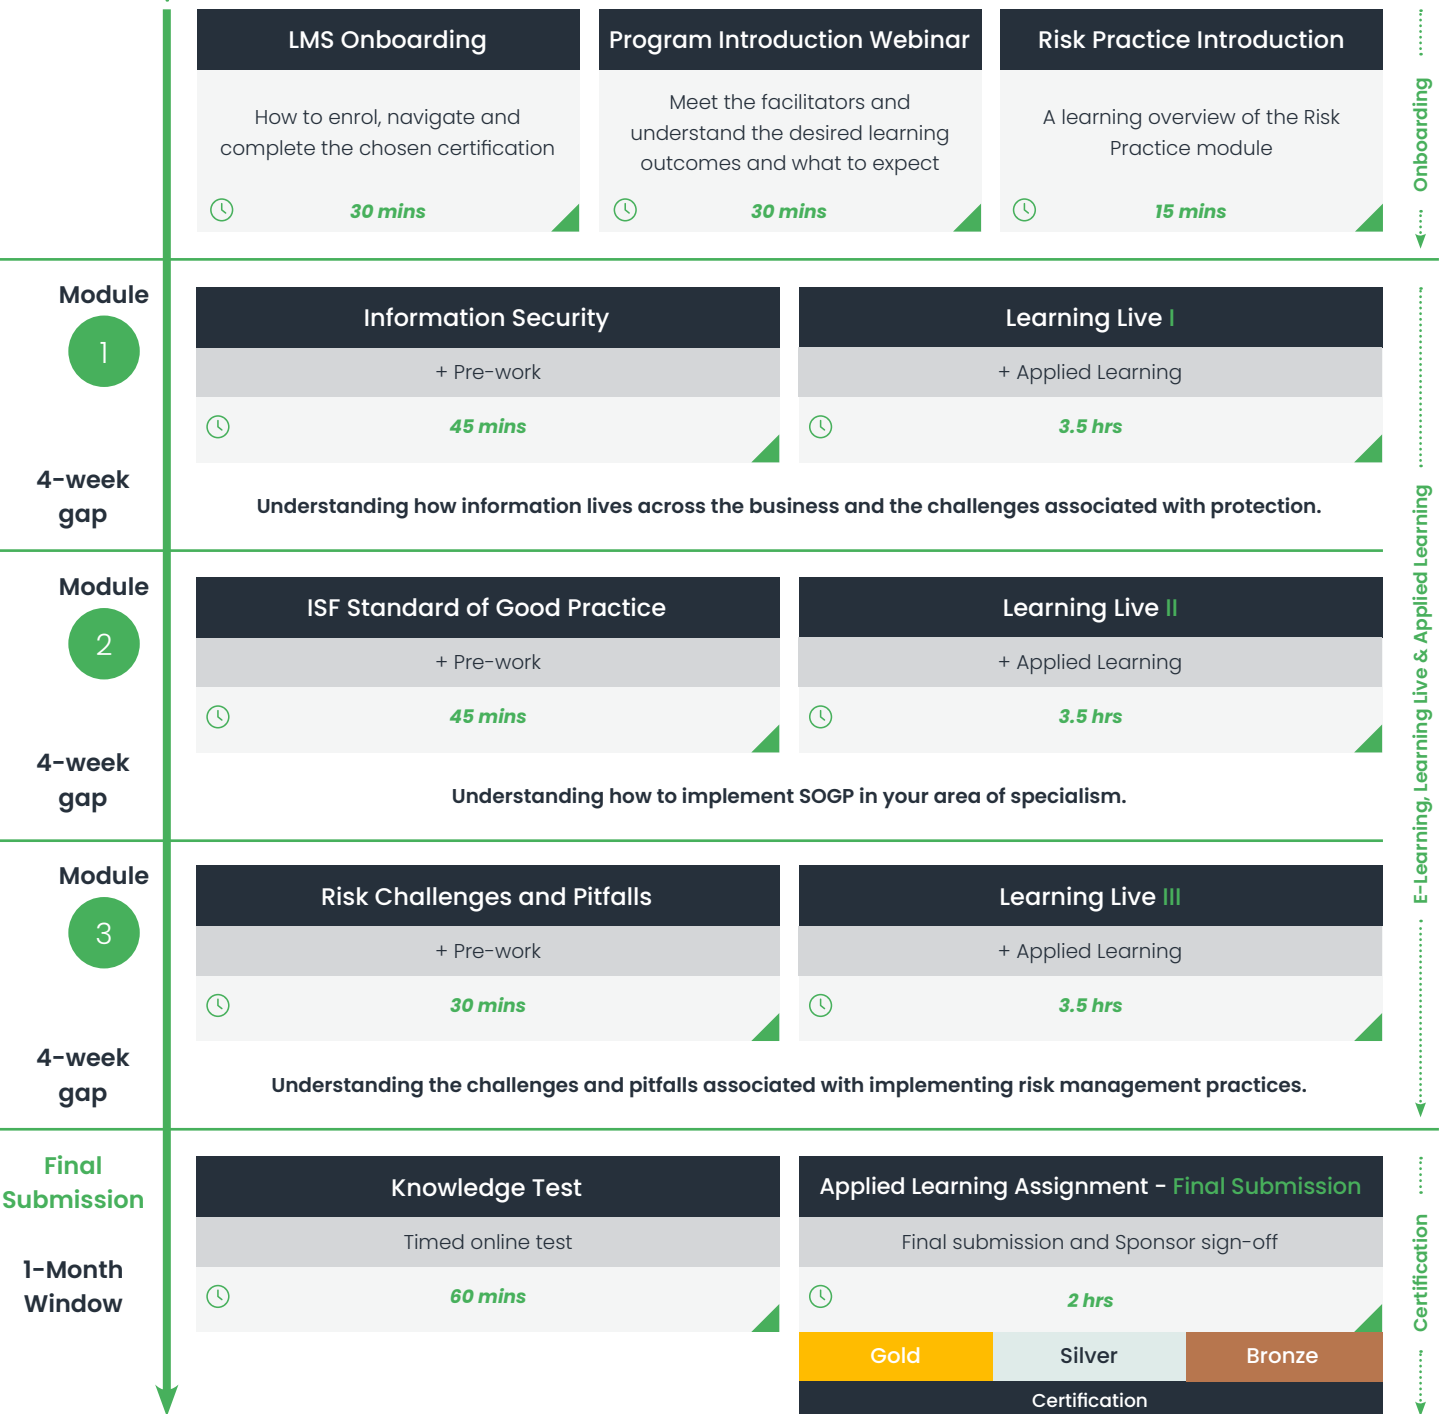

- 15 CPE points
- A Bronze, Silver or Gold Risk Practitioner Certification

## Risk Assessment

### Overview & Goal:

Risk Assessment from ISF Learning, examines how to carry out risk assessment through a business risk lens, not just one of compliance. The programme examines every aspect of assessing risk (including methodology) and in a way that drives decisive action and value outcomes for the Organisation.

The goal is to equip the practitioner to increase the adoption of risk assessment, by way of high rigour and high business engagement.

### Learning Modules

Risk Assessment features three modules, each accompanied by e-learning lessons and three x 1/2-day, live instructor-led sessions:

- 1. The Role of Risk Assessment** – The scope of risk assessments and what must exist in order for them to be successful.
- 2. Risk Engagement** – How to carry out risk assessment with maximum levels of rigour, stakeholder involvement and business engagement from key decision makers
- 3. Communicating Risk** – How to communicate risk assessment to business stakeholders and management in a way that creates a powerful case for action

### Learning Outcomes

#### By the end of this certification participants will be able to:

- Deliver risk assessments that drive successful business outcomes
- Increase involvement from key stakeholders
- Apply rigorous assessment methodology
- Gain new levels of intelligence through improved information gathering skills
- Carry out risk assessments with an increased business risk-focus (not just compliance focus)
- Translate risk assessment in clear business terms and communicate this with confidence

### ISF Certification Details

## Stakeholder Engagement

### Overview & Goal:

Stakeholder Engagement from ISF Learning, examines the needs and interests of the critical stakeholders with whom risk practitioners must work collaboratively to deliver results.

The goal is to equip the practitioner with the ability to engage in high-impact, high-quality face-to-face and verbal communication in situations where human interaction is critical. This module also enables practitioners to build a bridge of trust with stakeholders across different functions, authority levels, and communication styles.

### Learning Modules

Stakeholder Engagement features three modules, each accompanied by e-learning lessons and three x 1/2-day, live instructor-led sessions:

- 1. Managing Stakeholders** – Building effective relationships with critical stakeholders
- 2. Translating Risk** – Communicating and relating risk in business terms and common language
- 3. Communicating Adaptively** – Adapting your communication style to increase traction from critical stakeholders

### Learning Outcomes

**By the end of this certification participants will be able to:**

- Engender trust, establish relevance, and add value in stakeholder discussions
- Recognise what influences different types of stakeholders and
- Appreciate physical and emotional barriers to risk across different function owners
- Know how to relate and translate risk in business terms
- Tune in to a stakeholder's preferred communication mode
- Decomplexify risk

### ISF Certification Details

## Consulting Skills

### Overview & Goal:

Consulting Skills from ISF Learning, shows how risk practitioners can apply a consulting mindset and skillset to their work. Enabling them to develop effective solutions to information security problems across the organisation.

The goal is to equip practitioners with the ability to work with business functions and other teams to achieve lasting and improved business outcomes. Practitioners will act with greater responsibility and accountability, gaining respect across the business by consistently achieving 'win-win' results across diverse business functions.

### Learning Modules

Consulting Skills features three modules, each accompanied by e-learning lessons and three x 1/2-day, live instructor-led sessions:

- 1. Driving Powerful Conversations** – Carrying out consultative risk conversations with Socratic questioning technique
- 2. Collaborating With Stakeholders** – Working collaboratively across the Organisation to achieve sustainable outcomes
- 3. Building Trust and Authority** – Increasing your influence with stakeholders and building strong equity in your relationships

### Learning Outcomes

**By the end of this certification participants will be able to:**

- Be both business-centric and risk-focused in their interactions
- Get to the heart of problems quickly and identify inhibitors and barriers
- Gain buy-in and involvement from stakeholders
- Gather quality intelligence in a wide range of information security risk scenarios
- Work with increased authority, assertiveness, and engagement

### ISF Certification Details

**Upon completion of this certification, you will receive:**

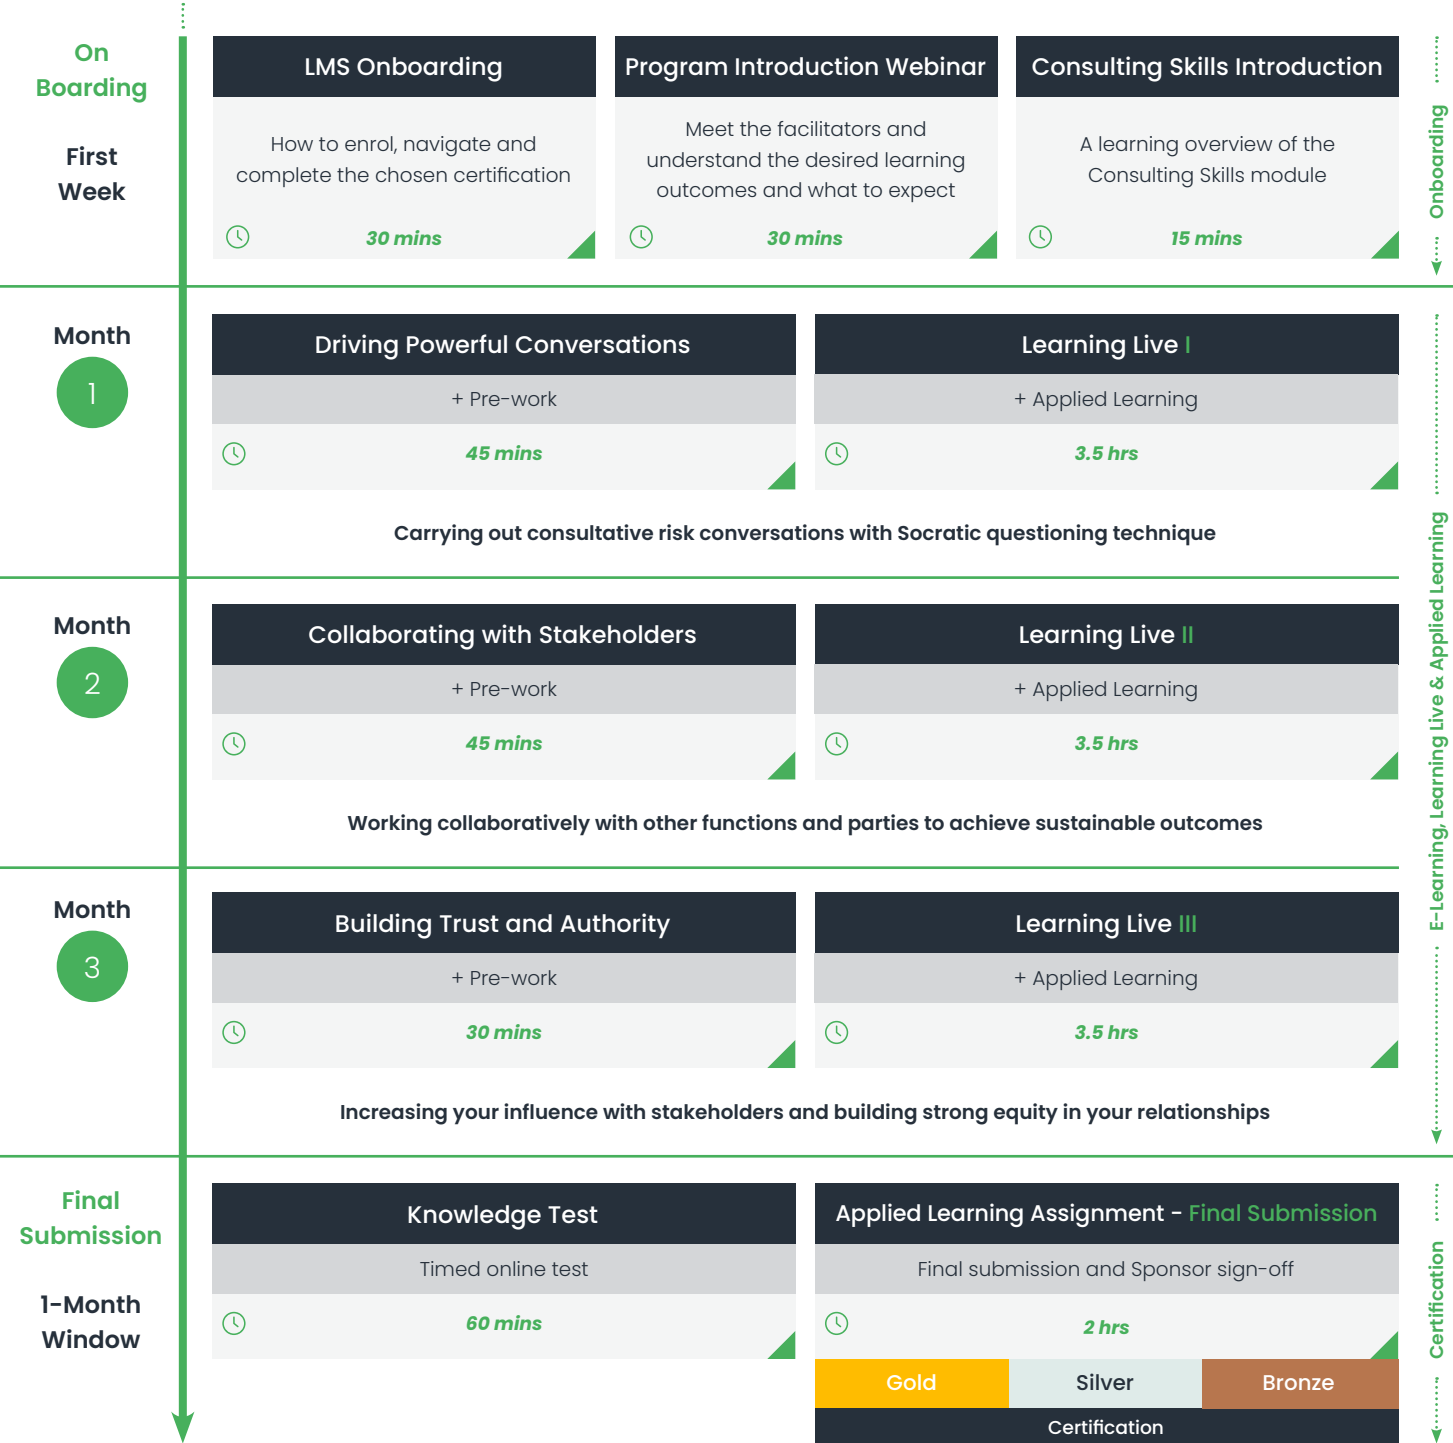

- 15 CPE points
- A Bronze, Silver or Gold Risk Practitioner Certification

## Adapting to Change

### Overview & Goal:

Adapting to Change from ISF Learning, examines how Information risk practitioners can adopt, a growth mindset and approach that will drive continuous operational improvement.

The goal, is to equip practitioners with a toolkit of mindset, personal efficacy and facilitation skills to help them become an agent of change inside the information security function and the wider organisation.

### Learning Modules

Adapting to Change features three modules, each accompanied by e-learning lessons and three x 1/2-day, live instructor-led sessions:

- 1. Driving Improvement** – Innovating how information security operates by way of continuous improvement
- 2. Overcoming obstacles** – Identifying and removing barriers within the information security environment
- 3. Thought leadership** – Educating stakeholders and informing decisions with inspiring new thinking and powerful insight

### Learning Outcomes

#### By the end of this certification participants will be able to:

- Steer, navigate and drive work programmes with increased focus and control
- Drive continuous improvement, by applying a growth mindset
- Remove fixed mindsets and inspire new ways of driving increased value to the organisation
- Help drive the information security mission across the Organisation by becoming a thought leader

### ISF Certification Details

**Upon completion of this certification, you will receive:**
